Merced/Mariposa County

Detwiler Fire

If you lost permanent fencing, need debris removed to replace fence or over roadways, and/or need to replace pumps and spring boxes you may be eligible for assistance through the ECP program

- ECP covers losses on a “cost share” basis. We will pay 75% of actual costs **or** up to our set maximum, whichever is smaller

If you have a loss:

A cost share request (FSA-848) will need to be completed. Please call the FSA office at (209) 722-4119 X2.

ECP is a very time sensitive program, as soon as you are able to get on your property to assess the extent of damage please call the FSA office so we can make our visit to see what practices and components of this program will be needed.

In order for the FSA office to implement this program it will need to be approved by the Merced/Mariposa County Committee (COC). Once approved by COC a funding request will be made and once funded eligible producers will be notified of funds available and the cost share provided by FSA

Possible Areas of Assistance:

- Removing debris from fence lines
- Removing debris from roads
- Replacing permanent fences
- Replacing damaged water facilities

Timeline:

Report to FSA office your needs for the program so a field inspection can be done and a “cost share request” (FSA-848) can be completed

Needs determination and environmental reviews are completed by FSA office and request is submitted to County Committee (COC) for approval

Producer receives approval to start project (Exceptions can be made to start before COC approval if requested)

Once completed producer turns in all receipts and FSA verifies project is completed

Payment is issued to producer

Important Info:

Payment limitation of \$200,000

*The information listed above is an overview of the program requirements and does not cover all areas to be eligible for payment. Please call the FSA office for more details
